Method and Apparatus for Characterizing Cells, Cell Aggregates and/or Tissue

Abstract

This invention relates to an apparatus for characterizing cells, cell aggregates and/or tissue with an analysis unit which includes means by which morphological parameters of cells, cell aggregates or tissue are detected and which furthermore includes means by which the detected morphological parameters are evaluated for the purpose of the objective morphological characterization of the cells, cell aggregates or tissue. The invention furthermore relates to a method for objectively characterizing cells, cell aggregates and/or tissue.
